Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lamons (US Patent 5,345,636) or Davis (US Patent 2,645,858).

Claims 7 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lowther (US Patent 2,307,892) or Wheeler (US Patent 6,272,758).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Lowther (US Patent 2,307,892) or Wheeler (US Patent 6,272,758) in view of Goerler (US Patent 3,858,325) and Lentino (US Patent 5,070,562).

Either one of Lowther or Wheeler teaches in the figures most of the elements of the claimed. Goerler teaches a gauge for identifying a diameter and threads of an elongated member as seen figure 1. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a plurality of

different size holes as suggested by Goerler in the device of either Lowther or Wheeler for the purpose of identifying a diameter and threads of an elongated member

Lentino teaches a combination accessory for a tool including a tapered slot therein. It would have been obvious one having ordinary skill in the art at the time the invention was made to incorporate a tapered slot as taught by Lentino in the device of either one of Lowther or Wheeler for the purpose of marking a workpiece for an intended cut.
